

SocialNode — Regular License Agreement

Copyright (c) 2026 SocialNode. All rights reserved.

License Notice

This source code package is provided as a licensed digital product. **The source code is licensed, not sold.** Purchasing this product does not transfer ownership, copyright, or intellectual-property rights to the buyer.

This **Regular License** grants the buyer a limited, non-exclusive, non-transferable license to use and modify the SocialNode source code for **one personal, non-commercial end product**.

This license is valid for **one (1) year from the date of purchase**.

By purchasing, downloading, installing, modifying, or using the source code, the buyer agrees to all terms of this license.

1. Permitted Use

The buyer may:

- Use the source code for personal and non-commercial purposes.
- Build and customize **one personal, non-commercial end product**.
- Modify the UI, branding, configuration, assets, and source code for the permitted end product.
- Modify the source code internally for development, testing, and maintenance.
- Compile and use the finished application for personal, non-commercial purposes.
- Create updates and builds of the same permitted end product during the active license period.

2. Commercial Use

The Regular License **does not permit commercial use**.

The buyer may not use the SocialNode source code or the licensed end product:

- For a company or business.
- For a paid client or commercial client project.
- As part of a paid service.
- As a commercial product or service.
- To generate revenue directly or indirectly.
- For commercial deployment or monetization.
- For a business, startup, organization, or other commercial operation.

Commercial use requires a valid **Extended Commercial License**.

3. One End Product

The Regular License permits the buyer to use the source code for **one personal, non-commercial end product only**.

A separate license is required for each additional independent end product.

The buyer may create different versions, updates, builds, and releases of the same licensed end product during the active license period.

4. Source Code Restrictions

The buyer may not:

- Resell the original or modified SocialNode source code.
- Redistribute, share, upload, publish, leak, or give away the source code.
- Sublicense or transfer independent rights to the source code.
- Sell the source code on any marketplace, website, repository, private group, or file-sharing platform.
- Repackage the source code as another template, starter kit, boilerplate, clone, or competing source-code product.
- Use the source code to create another source-code product for resale or distribution.
- Make the source code available to the public.
- Claim ownership or authorship of the original SocialNode source code.
- Remove or alter copyright or license notices from the source package or documentation.

The buyer may modify the source code for the permitted end product, but modification does not give the buyer ownership of the original SocialNode source code.

5. Distribution of the Finished Application

The buyer may distribute the **finished non-commercial application** for the permitted personal end product.

Distribution of the source code itself is not permitted.

The buyer may not provide the source code to another person or company for independent use, resale, redistribution, or repackaging.

6. Client and Business Projects

The Regular License does not permit:

- Paid client projects.
- Commercial client projects.
- Company or business projects.
- Startup or commercial product development.

- Commercial freelance work using the SocialNode source code.

A valid **Extended Commercial License** is required for these uses.

7. Third-Party Services

The buyer is responsible for creating and using their own Supabase, Firebase, Expo/EAS, Agora, and other third-party service accounts, credentials, API keys, billing, and configuration.

No private seller credentials are included or transferred with this license.

The buyer is responsible for complying with the terms, policies, and requirements of all third-party services used with SocialNode.

8. Ownership

The original SocialNode source code, architecture, structure, documentation, design system, template materials, and other original materials remain the intellectual property of the original author.

The buyer receives only the limited license rights expressly granted by this agreement.

No ownership or copyright in the original SocialNode source code is transferred to the buyer.

9. License Term

This Regular License is valid for **one (1) year from the original purchase date**.

The license automatically expires at the end of the one-year period unless renewed or replaced with another valid license.

After expiration, the buyer must cease using the licensed SocialNode source code unless the license has been renewed.

The buyer may not continue development, modification, deployment, or other use of the licensed source code after expiration without a valid active license.

10. License Expiration and Existing End Product

Expiration of the license does not transfer ownership of the SocialNode source code to the buyer.

The buyer must not use the SocialNode source code for new development, modifications, additional deployments, or additional end products after the license expires unless the license is renewed.

Any continued use of the source code after expiration requires a valid renewed license.

11. License Termination for Violation

The license may be terminated if the buyer materially violates the terms of this agreement.

Examples of material violations include unauthorized resale, redistribution, sharing, publication, sublicensing, commercial use, or creation of a competing source-code product.

Upon termination, the buyer must cease all use of the licensed source code and, where applicable, remove unauthorized copies under the buyer's control.

Termination does not transfer ownership of the source code to the buyer.

12. No Warranty

The source code is provided on an "**as is**" basis to the extent permitted by applicable law.

The author does not guarantee that the source code will remain compatible with every future version of React Native, Expo, Supabase, Firebase, Agora, operating systems, app stores, or other third-party services.

13. Marketplace Terms

If SocialNode is purchased through a marketplace, the marketplace's applicable terms may also apply.

The buyer must comply with both the applicable marketplace terms and this license.

Where permitted by applicable law, restrictions against unauthorized resale and redistribution of the SocialNode source code remain in effect.

14. Acceptance

By purchasing, downloading, installing, modifying, or using SocialNode under this Regular License, the buyer acknowledges that they have read, understood, and agreed to these terms.
