

SocialNode — Extended Commercial License Agreement

Copyright (c) 2026 SocialNode. All rights reserved.

License Notice

This source code package is provided as a licensed digital product. **The source code is licensed, not sold.** Purchasing this product does not transfer ownership, copyright, or intellectual-property rights to the buyer.

This **Extended Commercial License** grants the buyer a limited, non-exclusive, non-transferable license to use and modify the SocialNode source code for **one commercial end product**.

This license is valid for **one (1) year from the date of purchase**.

By purchasing, downloading, installing, modifying, or using the source code, the buyer agrees to all terms of this license.

1. Permitted Commercial Use

The buyer may:

- Use the source code for commercial purposes.
- Use the source code for their own company, business, startup, organization, or commercial project.
- Build and customize **one commercial end product**.
- Modify the UI, branding, configuration, assets, backend configuration, and source code for the permitted end product.
- Modify the source code internally for commercial development, testing, maintenance, and production use.
- Compile, deploy, publish, distribute, and monetize the finished commercial application.
- Publish the finished application through Google Play Store, Apple App Store, or other lawful app distribution platforms.
- Operate the finished application as part of a commercial product, service, business, or organization.
- Create updates, builds, and releases of the same permitted commercial end product during the active license period.

2. One Commercial End Product

The Extended Commercial License permits the buyer to use the SocialNode source code for **one commercial end product only**.

A separate license is required for each additional independent end product.

Different versions, updates, builds, and releases of the same licensed end product are permitted during the active license period.

3. Client Projects

The buyer may use the SocialNode source code for **one paid client project** as the permitted commercial end product.

The buyer may customize the source code according to the client's requirements and deliver the finished application to the client.

The client may receive the compiled application and project files reasonably necessary to operate and maintain that finished application.

However, the client does not receive ownership of the original SocialNode source code and may not independently resell, redistribute, sublicense, publish, or repackage the SocialNode source code as another template, starter kit, boilerplate, clone, competing product, or source-code product.

4. Source Code Restrictions

The buyer may not:

- Resell the original or modified SocialNode source code.
- Redistribute, share, upload, publish, leak, or give away the source code.
- Sublicense or transfer independent rights to the source code.
- Sell the source code on any marketplace, website, repository, private group, or file-sharing platform.
- Repackage the source code as another template, starter kit, boilerplate, clone, or competing source-code product.
- Use the source code to create another source-code product for resale or distribution.
- Make the source code publicly available.
- Claim ownership or authorship of the original SocialNode source code.
- Remove or alter copyright or license notices from the source package or documentation.
- Grant another person or company independent rights to the original SocialNode source code.

The buyer may modify the source code for the permitted commercial end product, but modification does not give the buyer ownership of the original SocialNode source code.

5. Commercial Distribution

The buyer may commercially publish, distribute, operate, and monetize the finished application created under this license.

This includes:

- Google Play Store
- Apple App Store

- Other lawful app stores
- Direct commercial distribution
- Paid applications
- Subscription-based applications
- Applications supported by advertising
- Applications operated as part of a commercial service or business

The permission applies to the **finished end product** and does not permit resale or redistribution of the SocialNode source code itself.

6. Company and Business Use

The buyer may use the source code for their own company, business, startup, organization, or commercial operation.

The buyer may deploy the permitted end product internally or publicly for legitimate business purposes, subject to applicable laws and third-party service terms.

7. Third-Party Services

The buyer is responsible for creating and using their own Supabase, Firebase, Expo/EAS, Agora, and other third-party service accounts, credentials, API keys, billing, and configuration.

No private seller credentials are included or transferred with this license.

The buyer is responsible for complying with the terms, policies, and requirements of all third-party services used with SocialNode.

8. Ownership

The original SocialNode source code, architecture, structure, documentation, design system, template materials, and other original materials remain the intellectual property of the original author.

The buyer receives only the limited commercial license rights expressly granted by this agreement.

No ownership or copyright in the original SocialNode source code is transferred to the buyer.

9. License Term

This Extended Commercial License is valid for **one (1) year from the original purchase date**.

The license automatically expires at the end of the one-year period unless renewed or replaced with another valid license.

After expiration, the buyer must cease using the licensed SocialNode source code unless the license has been renewed.

The buyer may not continue development, modification, deployment, or other use of the licensed source code after expiration without a valid active license.

10. License Expiration and Existing End Product

Expiration of the license does not transfer ownership of the SocialNode source code to the buyer.

The buyer must not use the SocialNode source code for new development, modifications, additional deployments, or additional independent end products after the license expires unless the license is renewed.

Any continued use of the source code after expiration requires a valid renewed license.

11. License Termination for Violation

The license may be terminated if the buyer materially violates the terms of this agreement.

Examples of material violations include unauthorized resale, redistribution, sharing, publication, sublicensing, or creation of a competing source-code product.

Upon termination, the buyer must cease all use of the licensed source code and, where applicable, remove unauthorized copies under the buyer's control.

Termination does not transfer ownership of the source code to the buyer.

12. No Warranty

The source code is provided on an "**as is**" basis to the extent permitted by applicable law.

The author does not guarantee that the source code will remain compatible with every future version of React Native, Expo, Supabase, Firebase, Agora, operating systems, app stores, or other third-party services.

13. Marketplace Terms

If SocialNode is purchased through a marketplace, the marketplace's applicable terms may also apply.

The buyer must comply with both the applicable marketplace terms and this license.

Where permitted by applicable law, restrictions against unauthorized resale and redistribution of the SocialNode source code remain in effect.

14. Acceptance

By purchasing, downloading, installing, modifying, or using SocialNode under this Extended Commercial License, the buyer acknowledges that they have read, understood, and agreed to these terms.
